Education

Bachelor of Science in Computer Science, Minor in Mathematics May 2026
East Stroudsburg University *East Stroudsburg, PA*

Technical Skills

Languages: Python, C#, Java, JavaScript, SQL, C++, HTML/CSS
Frameworks: FastAPI, ASP.NET Core MVC, Entity Framework Core, React
Databases & Cloud: PostgreSQL, SQL Server, SQLite, ChromaDB, Microsoft Azure, Azure Blob Storage, Neon
Tools: Git, GitHub, Docker, Pytest, SQLAlchemy, REST APIs, OpenAI API, Render, Vercel

Experience

AI-Powered Document Insights & Data Extraction Extern June 2026 – Aug. 2026
Extern, Hosted by Pfizer *Remote*

- Engineered a Python retrieval-augmented generation (RAG) pipeline for document sets up to 500 pages, combining PyMuPDF extraction, Tesseract OCR, document chunking, embeddings, and vector search.
- Implemented keyword and semantic retrieval with combined-score reranking to select relevant context before passing documents to an LLM for grounded responses and structured data extraction.
- Designed the retrieval workflow to preserve document context and traceability, enabling relevant passages to be identified and supplied to the LLM rather than relying on full-document prompts.

Full Stack Developer Intern Jan. 2026 – May 2026
East Stroudsburg University *East Stroudsburg, PA*

- Developed and deployed a full-stack content platform with C#, ASP.NET Core MVC, Entity Framework Core, and SQL Server supporting 30+ discussion threads and 100+ image uploads.
- Designed the relational data model and managed 10+ EF Core code-first migrations, maintaining database schema changes throughout feature development and deployment.
- Integrated Azure Blob Storage for persistent media storage, connecting application-managed image uploads with database-backed content and user-facing views.

Student Researcher, Virtual Reality Classroom Platform May 2024 – Aug. 2024
East Stroudsburg University *East Stroudsburg, PA*

- Developed interactive C# components in Unity for a virtual reality classroom, implementing user interactions with virtual whiteboards and classroom objects.
- Collaborated on a 2-person development team to design, implement, and test interactive VR features, integrating C# scripts with Unity scenes and user interactions.

Projects

DevOps Incident Tracker *[GitHub] | Python, FastAPI, SQLAlchemy, SQLite, Pytest, Docker* 2026

- Built a Python/FastAPI incident management service that validates operational events, automatically creating incidents from ERROR/CRITICAL events as well as response times above 2,000 ms, and supports incident resolution through REST endpoints.
- Implemented SQLAlchemy persistence with event and incident filtering, an OPEN/RESOLVED lifecycle, transaction handling, and configurable SQLite storage for reliable incident tracking.
- Developed a Pytest suite covering API behavior, validation, filtering, incident detection, resolution, and edge cases, then containerized the service with Docker and persistent database volumes.

LLM Observatory *[Live Demo] | FastAPI, React, PostgreSQL, SQLAlchemy, OpenAI API, Render, Vercel, Neon* 2026

- Built and deployed a full-stack LLM observability platform with FastAPI and React that records 3 telemetry metrics for tracked model requests: latency, token usage, and API cost.
- Implemented an automated LLM-as-judge evaluation pipeline that scores generated responses on a 0–1 quality scale, enabling consistent evaluation of model outputs.
- Designed PostgreSQL telemetry schemas with SQLAlchemy to persist model requests, evaluation results, and usage data for application-level analytics.

Leadership & Involvement

Resident Advisor, S.T.E.M. Living-Learning Community Jan. 2024 – May 2026
East Stroudsburg University *East Stroudsburg, PA*

- Supported and mentored 45+ STEM students by coordinating community programming, communicating campus resources, and documenting residential processes.
